- Drive effective strategic planning practices
- Manage regulatory and compliance issues
- Enhance internal process management
- Control risk and sustainability
- Effective financial management and improved budgeting processes
- Manage people and your organisation's culture
- Flexibility to adapt to change

ENERGY

The energy sector is a highly regulated industry that faces many challenges, including demand fluctuations, price volatility, restructuring, new competition, and a need for sustainability strategies. It focuses on the need to efficiently and easily manage costs, assets, employees, customers and services.

The energy sector is experiencing important changes with new players, such as renewable power sources like wind generated energy, coming into the marketplace. Challenges include managing assets and a workforce spread over large regions, and dealing with changes to safety and environmental regulations. From customer information systems, asset management and mobility solutions that manage a dispersed workforce, to financial and operational management, TechnologyOne's integrated business solutions can support this dynamic and changing industry.

WHAT IS ONEENERGY?

Contact management

Energy suppliers require a robust solution to manage contacts and interactions with stakeholders. This makes it imperative to ensure all contact with both individuals and organisations is captured and can be reported on. The Contact Management solution captures and manages information (such as contact types, structures, relationships, and other information fields) and links it to related records and activity types. Integration with Microsoft Outlook enables email tracking and contact and appointment synchronisation.

Enterprise asset management

Gain a complete view of the asset life cycle. Manage infrastructure assets, save money, and improve maintenance scheduling and completion. Deliver new infrastructure projects on time and on budget with management of project budgets and contracts, and successfully manage complex linear and network assets.

Contract management

The Contracts Management solution manages procurement, service, and capital works contracts. It serves as a document repository for related files and responding parties for tenders. Contractor qualifications are monitored, providing alerts based on expiry dates and minimum criteria for contracts.

Document management

TechnologyOne Enterprise Content Management provides a single point for all of your document management requirements. Documents such as supplier invoices and personnel and client records can be securely stored and only accessed by authorised users. Embedded workflows can be used to send requests, policies, procedures, and reviews and approvals to meet accreditation requirements.

Procure to pay

Manage the 'procure to pay' process from request for quotation through to purchasing, delivery, invoice matching, and payment. Improve productivity through the use of web-based catalogues, electronic document transmission, and invoice scanning. Oversee processes through commitment and funds control, workflow, purchasing delegation, and payment authorisation.

ONEENERGY IS A COMPREHENSIVE END-TO-END SOLUTION THAT PROVIDES ORGANISATIONS OPERATING WITHIN THE ENERGY INDUSTRY WITH A SINGLE AND HIGHLY FUNCTIONAL PLATFORM FOR THE MANAGEMENT OF CORPORATE, OPERATIONAL, STAKEHOLDER AND STRATEGIC MANAGEMENT PROCESSES.

Effective financial management

Effectively manage and monitor revenue and expenses with real-time reporting and take immediate action with alerts. Take control of revenue and funding through a real-time profit and loss. Drill down to source transactions from any module across the solution, including scanned images of invoices or documents, and eliminate unnecessary reconciliation to multiple systems.

Productivity features

Leverage information to drive improvements. Generate real-time reports, set up alerts and workflow, and automate business processes, allowing you to take action when needed and simplifying daily activities.

Manage people and culture

Effectively manage human resource functions and employee development, integrating this information with data uploaded

through the employee self-service functionality. Allow employees to monitor payroll information, leave entitlements, and training and development information online, any time. Manage all aspects of OH&S and training and compliance.

Good governance

For energy organisations to support stakeholders, they need easy access to sound and reliable information. OneEnergy delivers information from a single access-point across multiple systems, providing complete transparency and visibility across departments. This will drive improvements, saving money, enhancing business processes and facilitating effective decision making.

Manage risk and sustainability

Use information available across the OneEnergy solution through integrated business intelligence and planning tools to develop future plans and devise strategies to improve their execution and overall

success. Effective planning and sound decision-making reduces the risk to your organisation and ensures the long-term sustainability of your business.

Flexibility

Take advantage of regular solution upgrades designed to meet changing business requirements and new legislation. OneEnergy's intuitive roles and workplace-driven user interface, together with its superior integration capabilities across departments, allows for an improved user experience and reduced training-related costs for new and existing staff.

HOW WAS ONEENERGY DEVELOPED?

OneEnergy was developed by TechnologyOne through close collaboration with our customer base throughout Australia and New Zealand.

Our utilities solutions team has worked with customers and used their experiences to develop the solutions that are required as part of a whole-of-organisation enterprise solution for organisations involved in the energy industry. Along with the solution configuration, TechnologyOne's utilities team has also devised advanced methodologies that improve implementation timeframes and costs.

Your business benefits from processes proven at other organisations, promoting common practices that underpin true resource sharing, generating further efficiencies and reducing the risks business can be exposed to when changing software solutions.

WHY?

Through our many partnerships, TechnologyOne has realised the need to develop a whole-of-organisation solution to meet the diverse requirements and operational challenges energy organisations face. These organisations require a solution that is flexible and robust, that provides functionality and integration across the whole organisation to improve processes and service provision.

Key Benefits

- One integrated, whole-of-organisation enterprise system
- Based on proven solutions and services practices
- A continually evolving solution
- Built on the best available technology platform
- Complete view of financial performance and comprehensive reporting capabilities
- Transparency and visibility between departments and staff
- Improved communication and interaction with internal and external stakeholders
- Flexibility to adapt to legislative and organisational change
- Reduced implementation time and ongoing service costs
- Rapid response support
- Superior service provision and consultants who are experts in the energy sector
- Ongoing customer relationship management
- Regular solution upgrades
- Continued interaction between TechnologyOne and customers for future developments

WHO CAN USE ONEENERGY?

Your staff benefit from a totally integrated system designed to automate business processes, deliver consistent and secure information which enhances the user experience.

Asset and project management

From major asset replacement projects to regular upgrade initiatives, integrated project management ensures managers have a clear view of progress and all variables. With integration to the procurement function, all costs, deliveries and payments can be monitored and controlled. Workforce needs can be managed in conjunction with works management and human resource functions.

Marketing and communications

Improve marketing and communication functions with a flexible system for customer relationship management. OneEnergy's CRM system manages relationships and all stakeholder contacts, including clients, community bodies, businesses, partners, suppliers and internal stakeholders. Track and manage campaigns, media, direct marketing, awareness raising and event activity, and measure results.

Finance

Manage your organisation's financial data in one effective solution, with the ability to produce targeted reports to assist with strategic decision-making. The unique 'workplace' concept provides a consistent user experience for the role or roles they are performing. Each user is delivered a set of menus and workflows that represent their business processes.

Procurement

Streamline the procurement lifecycle from requisition through to creation, order and payment. The procurement department can choose to automate either all or parts of the procurement lifecycle. This streamlined process reduces manual entry, enabling users to spend more time managing requisitions and ensuring service delivery is met by contractors and suppliers.

Human resources

Manage people and organisational culture through integrated functionality. Enter and track information related to employee recruitment, retention and attrition, employee development, staff training and OH&S. The system also provides staff with an intuitive employee self-service function.

Payroll

Seamlessly manage payroll processes with full integration to the financials system, providing an accurate view of payroll expenditure across the whole organisation. Employees enter timesheet and leave information online which is then sent through the Workflow module to obtain approvals. Timesheet accuracy is ensured and multiple leave types can be easily administered.

TechnologyOne's streamlined implementation of OneEnergy reduces risk to your organisation. The timeframe and resources required during implementation are reduced, guaranteeing a successful outcome. TechnologyOne's practices have proven successful within the utilities sector, and we analyse your needs to ensure our practices are suitable for your business, then execute and adjust if necessary. Our implementation is structured to ensure data is converted from your old system, staff are trained, and the new system is tested. These steps are all managed by our professional project managers who work alongside your staff to achieve the right result. All of our staff have significant project and implementation experience and can guide your organisation throughout the entire process.
